**EPA CERCLA Section 104(e) Request for Information: Yosemite Creek Superfund Site,
Gonzalez Bucket and Drum – August 20, 2013 (DuPont)**

Dear Mr. Dutta:

This letter responds to the August 20, 2013 request for information (“RFI”) of the United States Environmental Protection Agency (“EPA”) to E.I. du Pont de Nemours and Company (“DuPont”) with regard to the Gonzalez Bucket and Drum Company, Inc. site located at 1324 Fitzgerald Avenue, San Francisco County (the “Property”).

Subject to both the general and specific objections noted below, and without waiving these or other available objections or privileges, DuPont submits the following in response to the RFI and in accordance with the due date that EPA has established for this response.

GENERAL STATEMENTS AND OBJECTIONS

In responding to the RFI, DuPont has undertaken a reasonable and good faith search for, and review of, documents and information in its possession, custody or control and that are relevant to this matter. That search is continuing and ongoing, but DuPont provides this response based on currently known information. However, the RFI purports to seek a great deal of information that is not relevant to the Property or alleged contamination at the Property. For example, while we understand the basis for inquiring whether DuPont ever sent any materials to the Property, certain RFI questions seek information unrelated to the Property (*e.g.*, Requests 2, 11 and 17). Because such questions are not relevant to the Property, they are beyond the scope of EPA’s authority as set forth in Section 104(e)(2)(A) of the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”) (EPA may request information “relevant to . . . [t]he identification, nature, and quantity of materials which have been . . . transported to a . . . facility”). The RFI also seeks information on “hazardous wastes” generally and beyond the specific chemicals for which EPA purports to have evidence of a release or threatened release from the Property and are not relevant to the Property pursuant to Section 104(e)(2)(A) of CERCLA.

DuPont asserts the following general privileges, protections and objections with respect to the RFI and each information request therein.

1. DuPont asserts all privileges and protections it has in regard to the documents and other information sought by EPA, including the attorney-client privilege, the attorney work product doctrine, all privileges and protections related to materials generated in anticipation of litigation, the settlement communication protection, the confidential business information ("CBI") and trade secret protections, and any other privilege or protection available to it under law.
2. DuPont objects to any requirement to produce documents or information already in the possession of a government agency or already in the public domain.
3. DuPont objects to Instructions 1, 4 and 7 to the extent it seeks to require DuPont seek and collect information and documents that are not in its possession, custody, or control.
4. DuPont objects to Instruction 6 on the ground that EPA has no authority to impose a continuing obligation on DuPont to supplement these responses. DuPont will, of course, comply with any lawful future requests that are within EPA's authority.
5. DuPont objects to the RFI's definition of "document" or "documents" in Definition 3 to the extent it extends to documents not in DuPont's possession, custody, or control. DuPont disclaims any responsibility to search for, locate, and provide EPA copies of any documents "known [by DuPont] to exist" but not in DuPont's possession, custody, or control.

RESPONSES TO AUGUST 20, 2013 EPA INFORMATION REQUESTS

1. *State the full legal name, address, telephone number, position(s) held by, and tenure of the individual(s) answering any of these questions on behalf of E.I. DuPont de Nemours and Company, and/or any of its predecessors, subsidiaries, affiliated businesses or commercial enterprises. Specifically, this Request seeks information concerning the materials sent to Gonzalez Bucket and Drum Company, Inc. (Gonzalez Drum) or to the property at 1324 Fitzgerald Avenue, San Francisco, California 94124 (the Property).*

Response

These responses were prepared by Stephen Rahaim, DuPont Corporate Legal Counsel (1007 Market Street, DuPont Building – 7099, Wilmington, Delaware; 302-774-8720) with assistance from Andrew Mortl, a partner at Glynn & Finley, LLP (100 Pringle Avenue, Suite 500, Walnut Creek, California; 925-210-2800). At the request of Mr. Rahaim, internal DuPont resources and research were conducted to complete the requisite searches.

2. *Please state your company's business activity and its business activity code number. Describe the operations of your company and any waste materials or bi-products created as result of your operations. What chemicals or raw materials does your company use in its operations?*

Response

In addition to the General Objections set forth above, DuPont objects to this request as overbroad in scope, vague and unduly burdensome. Identifying the Company's business activities, code numbers and what chemicals or raw materials it uses in its operations is not feasible due to its long history of operations, the number of DuPont related subsidiaries, divisions, affiliates and branches, and the scope of the products manufactured by those entities. Notwithstanding the foregoing and without waiving its objections, DuPont responds as follows:

When it was initially founded more than 200 years ago, DuPont manufactured primarily explosive-related products. Currently, DuPont operates in more than 80 countries and manufactures a wide variety of products, including products related to: printing, agriculture, nutrition, electronics, communications, safety and protection, home and construction, transportation, and apparel. For a general overview of DuPont's business operations, please see www.dupont.com. Without waiving the General and Specific Objections herein, relevant information regarding DuPont's California facilities can be found at Attachment A.

3. *State the type of product and/or any services your company provided to Gonzalez Drum or performed at the Property.*

Response

Following a reasonable search, DuPont has not located any documents indicating that it ever provided any product or service to Gonzalez Drum or the Property. DuPont's research and investigation are ongoing.

4. *Please state whether you ever sent or transported materials, including used drums or containers, to Gonzalez Drum for treatment and/or disposal.*

Response

Following a reasonable search, DuPont has not located any documents indicating that it ever sent or transported materials, including used drums or containers, to Gonzalez Drum. DuPont's research and investigation are ongoing.

5. *For each shipment of materials, including drums or containers, you sent to Gonzalez Drum, please provide any documentation you have, including waste manifests, receipts, drum tickets, etc. For each shipment, identify who transported the materials to Gonzalez Drum and how it was transported. For each such instance, state the amount paid to each transporter for accepting the materials for transportations, and the method of payment and the identity of the person who paid each transporter.*

Response

Not applicable. See Responses to Requests 3 and 4.

6. *For each instance in which materials were sent to Gonzalez Drum, please describe the volume, nature, chemical composition, smell, physical state (e.g. liquid, solid), and other distinctive characteristics, and the dates that materials were sent to Gonzalez Drum, or as precisely as possible, the time period during which the materials were sent to Gonzalez Drum.*

Response

Not applicable. See Responses to Requests 3 and 4.

7. *Please provide copies of all descriptions of tests, analyses, and analytical results concerning any material sent to Gonzalez Drum.*

Response

Not applicable. See Responses to Requests 3 and 4.

8. *Please describe and provide all documents that concern or reflect any rebate, remuneration or other incentive provided to you for transporting materials to Gonzalez Drum.*

Response

Not applicable. See Responses to Requests 3 and 4.

9. Please describe the containers that were sent to Gonzalez Drum, including, but not limited to the type of container (e.g. 55-gallon metal drum, 15-gallon cardboard drum, 5-gallon metal pail, etc.); the condition of the container (e.g. open, closed, sealed, damaged, new, used); the color of the container; any markings on the container; and whether the container was provided by you or Gonzalez Drum.

Response

Not applicable. See Responses to Requests 3 and 4.

10. For each container sent to Gonzalez Drum, what was the container used to contain? Please describe the volume, nature, chemical composition, smell, physical state (e.g. liquid, solid), and other distinctive characteristics of the contents or the former contents of the containers sent to Gonzalez Drum.

Response

Not applicable. See Responses to Requests 3 and 4.

11. Please identify whether a Notification of Hazardous Waste Activity was ever filed with the EPA or the corresponding agency or official of the State of California with respect to any waste originating from E.I. DuPont de Nemours and Company, the date of such filing, the wastes described in such notice, the quantity thereof described in such notice, and the identification number assigned to such facility by EPA or the state agency or official.

Response

In addition to the General Objections set forth above, DuPont objects to this request as overbroad in scope and unduly burdensome. As stated in the RFI, EPA is seeking "information about the [P]roperty." However, in addition to the Property, Request No. 11 purports to also seek information regarding any Notification of Hazardous Waste Activity filed in California regardless of any connection to the Property. Any all facilities request has no nexus with the Property, and thus this request seeks information that is not relevant to the purpose of the RFI and is unduly burdensome. Without waiving the General and Specific Objections herein, relevant information regarding DuPont's California facilities can be found at Attachment A.

12. Please provide the names and last-known contact information (including but not limited to geographic and electronic addresses, and telephone numbers) for all persons employed by E.I. DuPont de Nemours and Company during the duration of operations when materials were sent to Gonzalez Drum.

Response

Not applicable. See Responses to Requests 3 and 4.

13. Please provide all logbooks, ledgers, or other documents that concern or reflect records for the transportation of materials to Gonzalez Drum.

Response

Not applicable. See Responses to Requests 3 and 4.

14. *Please provide all documents that concern or reflect communications with any person at Gonzalez Drum for any reason, including but not limited to price quotes and arrangements of any kind for disposal of materials or any other service provided by Gonzalez Drum.*

Response

Not applicable. See Responses to Requests 3 and 4. In addition, DuPont has not located any communications (regardless of subject matter) with Gonzalez Drum. DuPont's research and investigation are ongoing.

15. *Please state whether you have or had a permit or permits issued under RCRA for any waste being sent to Gonzalez Drum that was disposed of. If the answer is "yes" identify all such permits, including but not limited to the dates of issuance and a general description of the process permitted. Provide copies of all such permits.*

Response

Not applicable. See Responses to Requests 3 and 4.

16. *Please state whether you have or had a permit or permits under the hazardous waste laws of the state for any waste being sent to Gonzalez Drum that was disposed of. If the answer is "yes" identify all such permits, including but not limited to the dates of issuance and a general description of the process permitted. Provide copies of all such permits.*

Response

Not applicable. See Responses to Requests 3 and 4.

17. *Please state whether you have or had an EPA Identification Number or an identification number supplied by the any state Environmental Protection Agency, or any state sub-agency, department, or board which regulates environmental laws and requirements, at any time. Supply any such identification number(s) your company or business has or had at any time.*

Response

In addition to the General Objections set forth above, DuPont objects to this request as overbroad in scope and unduly burdensome. As stated in the RFI, EPA is seeking "information about the [P]roperty." However, in addition to the Property, Request No. 11 purports to also seek information regarding any EPA Identification Number "supplied by any state Environmental Protection Agency, or any state sub-agency, department, or board which regulates environmental laws and requirements, at any time." Such as request to a multinational company like DuPont is irrelevant and unduly burdensome. In addition, the request has no nexus with the Property, and thus this request seeks information that is not relevant to the stated purpose of the RFI. Without waiving the General and Specific Objections herein, relevant information regarding DuPont's California facilities can be found at Attachment A.

We are happy to continue to assist the EPA as appropriate, but as noted throughout, DuPont has not been able to locate any documentation related to the Property. Any questions EPA may have regarding the responses to the RFI may be directed to the undersigned.

Best Regards,

Stephen Rahaim, Esquire
Corporate Counsel

YES	NO	NO

**California and Non California Manifest Tonnage Total and Waste Code by Year Matrix by Entity Type (if available)
are on the next page**

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Calif. Manifest Counts and Total Tonnage

Top line represents Manifest Count and Bottom line represents Total Tonnage
